Summary

Software engineering candidate (B.Tech CSE, 2027) with hands-on experience building AI-driven, cloud-deployed applications: RAG pipelines with LangChain, Python/FastAPI inference services, and full-stack systems with REST APIs, SQL/NoSQL databases and Docker. Strong DSA foundation (LeetCode rating 1642, 300+ problems) and a habit of using GenAI tools (Copilot, Claude, Gemini) to prototype quickly and ship clean, maintainable code.

Education

IEC College of Engineering and Technology

Bachelor of Technology (B.Tech) – Computer Science and Engineering

Greater Noida, India

Expected 2027

Technical Skills

- **Languages:** Python, JavaScript, Java, SQL
- **AI & GenAI:** LangChain, RAG, OpenAI API, NLP, Generative & Agentic AI concepts, FastAPI (model serving)
- **AI-Assisted Development:** GitHub Copilot, Claude, Gemini (ideation, prototyping, code review, automation scripts)
- **Backend & APIs:** Node.js, Express.js, REST APIs, Socket.io, JWT Authentication
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, WebRTC
- **Databases:** SQL (mysql), MongoDB, Redis
- **Cloud & DevOps:** Docker, AWS (basic), cloud deployment (Vercel, Render, MongoDB Atlas), Git, GitHub, Postman
- **CS Fundamentals:** Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

Projects

SigmaGPT – AI Chatbot with RAG [Repo]

2026

Python, FastAPI, LangChain, OpenAI API, React.js, Node.js, MongoDB

- Built a **generative-AI chatbot with a LangChain RAG pipeline** delivering context-grounded, multi-turn answers over a custom knowledge base.
- Designed and deployed a **Python FastAPI inference microservice** and integrated it with a Node.js backend and MongoDB for persistent session history and user profiles.
- Added **voice input via Web Speech API** in React.js for hands-free interaction; achieved **92% accuracy** in internal response-quality benchmarks.
- Used AI-assisted tooling (Copilot/Claude) to speed up prototyping, debugging and test-case generation.

SkillSwap – Skill-Sharing Marketplace [Repo]

2026

React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Tailwind CSS

- Built a **full-stack, cloud-deployed marketplace** connecting learners and mentors through a **credit-based barter system**, translating a real-world need into a scalable application.
- Implemented **JWT authentication & authorization**, profiles, reviews, ratings and session-booking workflows with secure, well-structured REST APIs.
- Developed **geographical skill search and matching** based on interests, location and compatibility.
- Integrated **real-time chat and notifications using Socket.io**.
- Deployed on **Vercel, Render and MongoDB Atlas** with production-ready environment configuration and CORS management.

Video Conferencing App [Repo]

2026

React.js, Node.js, WebRTC, Socket.io, MongoDB

- Built **peer-to-peer video conferencing using WebRTC** with a Socket.io signaling server handling **SDP/ICE negotiation** for low-latency audio/video.
- Supported **multi-participant rooms (up to 8)** with screen sharing, mute controls and live in-call chat.
- Managed room lifecycle, participant state and session tokens in Node.js/Express.js; persisted meeting history in MongoDB.

Achievements

- **LeetCode – 300+ Problems Solved — Contest Rating 1642** [Profile] *Ongoing*
Solved **300+ problems** across arrays, strings, trees, graphs, dynamic programming and sliding window, with focus on optimal time and space complexity.
- **College DSA Contest – 2nd Rank** *2026*
Ranked **2nd college-wide among 150+ participants**, solving algorithmic problems under strict time limits.
